

How to install Ninja Strategy Generator

To start - Please find your Setup for Ninja Strategy Generator (.exe file). Right click on your file, then select open to run.

1. Select Destination Folder

- Setup will be install into the default destination folder.
- If you would like to select a different folder, click Browse.
- To continue, click Next.

2. Select Additional Tasks

- Put a check on the box to create a desktop shortcut.
- Click Next, to continue.

3. Ready to Install

- Click Install to continue with the installation, or click Back if you want to review or change any settings.

Ninja Strategy Generator For NinjaTrader

4. Completing the Setup

- Setup has finished installing Ninja Strategy Generator on your computer.
- Put a check on the box to Launch Ninja Strategy Generator after the setup.
- Click finish to exit Setup.

Ninja Strategy Generator

For NinjaTrader

Step by step process on how to use Ninja Strategy Generator

Open Ninja Strategy Generator

- Load the Excel file by clicking the Source (xls) button, then find your excel file, and click open.

- When you select a file, it will automatically open to the Parameters - that is the location of the data. That is the only file that will display all the data.

Ninja Strategy Generator

For NinjaTrader

Different top sections based on what you want to do.

Tab Section 1. **Change value**

Change a single value to all records in the file.

Example:

Change Period - Values

- Put New Value on the box. Then, click GO button.

Sheet1

COUNT: 21

100%

Tab Section 2. Single Record

Creates as a new output file spreadsheet. Original file is untouched. Generate multiple values with New Unique IDs.

Takes the first record and uses those values and creates multiple new strategies based on changes to new values.

Example:

1. Profit Target – 1 variable

- We change the value into Min. from 2 down to 1, and Max. from 2 to 5.
- **New ID** – Put your ID on the box to generate new unique ID's. Example: "ID-(numbers)".
- Then, put a check on the check box – Select column.

Usertype	EntryOnly				☐
Waitforchangeintrend	True				☐

Below the table, the 'NEW ID' is 'ID-1001' and a 'Generate' button is present.

Record – ID1(Original StrategyID in the spreadsheet on the 1st column) is now converted into 5 new records with New Unique IDs and ProfitTarget Values of 1 to 5.

The figure displays two side-by-side screenshots of the Microsoft Excel interface, illustrating the process of entering data and applying formulas.

Left Screenshot: The 'Formulas' tab is active in the ribbon. The formula bar shows 'B1' and 'StrategyID'. The spreadsheet shows a table with the following data:

Period	StrategyID	Indicator	OrderType	Aggressive	Barslookb	CancelBarC
5	ID-1001	Colored_NLimit	False		1	1
5	ID-1002	Colored_NLimit	False		1	1

Tab Section 3. Multiple Records – Multiple new strategies

Creates as a new output file spreadsheet. Original file is untouched. Generate multiple values for a single strategy.

Takes the first record and uses those values and creates multiple new strategies based on changes to new values.

Example:

- StopLoss – We change the value into Min. of 1 and Max. of 15.
- New ID – Put your ID on the box.
- Then, put a check on the check box – Select column.
